| About the Editors. | xiii |

PART I—ANALYSIS AND FATE

| | |
|--|----|
| 1. Soil Vapor Analysis to Document Solvent Contamination Sources, Contaminant Plume Geometry, and Evidence of Dehalogenation <i>Vanessa A. Gallo and Stephen E. Posten</i> | 1 |
| 2. Effect of Aging on Dissolution of Naphthalene from Crude Oil and Creosote <i>Mohammed Shafie, Catherine Pasion, and Subhasis Ghoshal.</i> | 11 |
| 3. Addition of Soybean Derived Fuel to Improve the Quality and Stability of Middle Distillate Fuel <i>George Mushrush and Douglas Mose</i> | 19 |
| 4. Adsorption of RDX to Soil with Low Organic Carbon: Laboratory Results, Field Observations, Remedial Implications <i>William A. Tucker, Gerald J. Murphy, and Eric D. Arenber</i> | 27 |

PART II—ENVIRONMENTAL FORENSICS

| | |
|--|----|
| 5. Investigation, Remediation and Cost Allocation of Contaminants from the Britannia Mine in British Columbia: A Case Study <i>Monica N. Danon-Schaffer</i> | 43 |
| 6. Speciation and Characterization of Heavy Metal-Contaminated Soils Using Computer-Controlled Scanning Electron Microscopy <i>Stephen K. Kennedy, William Walker, and Barbara Forslund</i> | 65 |

PART III—HEAVY METALS

| | |
|--|-----|
| 7. Can Standard Sequential Extraction Determinations Effectively Define Heavy Metal Species in Superfund Site Soils? <i>Cheryl L. Dahlin, Connie A. Williamson, W. Keith Collins, and David C. Dahlin</i> | 87 |
| 8. Vertical Migration of an Arsenic Pesticide in Soil <i>David J. Folkes and Robert A. Litle</i> | 115 |
| Removal of Lead from a Calcareous Soil by Chloride Chelation <i>S. A. Wasay, Wayne J. Parker, and Paul J. VanGeel.</i> | 129 |

PART IV—HUMAN HEALTH AND RISK

10. Development of Criteria to Evaluate Indoor Radon
Potential in East Coast Homes
Douglas G. Mose and George W. Mushrush147
11. Integrating Physical Models and Exposure
Models for Risk Assessment
Ralph Perona and Mark Tardiff163

PART V—MTBE

12. Rate of Natural Attenuation of Tertiary Butyl
Alcohol at a Chemical Plant
Michael J. Day and Terry W. Gulliver 177
13. In-Situ Remediation of an MTBE Contaminated Soil
and Groundwater Using OxyVac® Technology
Joleen Kealy, Robert Roth, and Joseph Pezzullo189
14. Applying NRC Guidelines for Natural Attenuation of MTBE
Bruce E. Rittmann199
15. Intrinsic Bioremediation of MTBE
James A. M. Thomson213

PART VI—REMEDICATION

16. Organoclay Remove Organics and Metals from Water
George Alther223
17. Emergency Response Actions and Bioremediation
of a 700-Gallon Diesel Fuel Spill, Palmer Railroad
Yard, Palmer Massachusetts
Paul G. Beaulieu and Francis J. Hopcroft233
18. Remediation of a High Priority Petroleum Site Using
a Combination of Remedial Technologies
Scott D. Hartsough 245
19. Peroxide Oxidation for Treating Soils Beneath
a Residential Basement
Daniel K. Mason 267
20. Modeling the Fate of Root Exudates and Their Effects
on Cesium Partitioning in the Rhizosphere
*Lori S. Siegel, Akram N. Alshwabkeh,
and Melinda A. Hamilton* 283
- Plant Contamination in Phytoremediation:
Model Applications and Bioavailability Analysis
Kijune Sung, M. Yavuz Corapcioglu, and Malcolm C. Drew 301
22. In-Situ Chemical Oxidation of Saturated and
Unsaturated Petroleum-Containing Soils at a

| | |
|--|-----|
| Historic Railroad Site <i>Andrew R. Vitolins, Bruce R. Nelson,</i> <i>and LeeAnn M.H. Thomas</i> | 319 |
| 23. Integrated Modeling Application in a Remedial System Design <i>Zhijian Zhang</i> | 329 |

PART VII—SEDIMENTS

| | |
|--|-----|
| 24. Natural Resources Damages Assessments and Claims in the Great Lakes Basin <i>Charles M. Denton, Esq. and R. Craig Hupp, Esq.</i> | 353 |
| 25. Characterizing the Spatial Extent of Biologically Relevant Sediment Contamination at Impacted Sites <i>Joseph M. Jersak and Eric M. Cherry</i> | 435 |
| 26. Application of Sediment Toxicity Tests in Site Assessment and Site Management <i>David W. Moore</i> | 443 |

PART VIII—SITE ASSESSMENT

| | |
|---|-----|
| 27. Long Term Monitoring of Hydrocarbon Contamination Using Multi-Level Vapor Phase Piezometers <i>P. Pearce, Wayne J. Parker, and Paul J. VanGeel</i> | 453 |
| 28. An Evaluation of Soil Background Concentrations in South Boston <i>Martha L. Zirbel, John R. Nelson, Mark E. Radville,</i> <i>and William Levy</i> | 477 |
